

## Acceptable Use Policy

Within the broader goal to advance the development of the digital economy in Canada, CANARIE network infrastructure and services are provided to support research, education, advanced application development and usage by Canadian research, education, government, and industry organizations.

The CANARIE network can be used for any legal purpose in support of this goal, so long as it does not interfere with or adversely affect the operation of the CANARIE network or any network user, as may be determined by CANARIE.

CANARIE reserves the right, through its published governance processes, to modify this AUP from time to time and intends to provide advance notice of any such modifications.
