

Canadian Access Federation: Trust Assertion Document (TAD) for Participating Organizations

Purpose

Identity attributes are characteristics of an identity -- such as a name, department, location, login ID, employee number, e-mail address, etc.

A fundamental requirement of Participants in the Canadian Access Federation (CAF) is that by their authority they send accurate identity attributes to other Participants to allow access to resources, and that Participants receiving an attribute assertion protect it and respect privacy constraints placed on it by the asserting Participant.

To accomplish this practice, CANARIE requires Participants to make available to all other Participants answers to the questions in this document.

Canadian Access Federation Requirement

The CAF community of trust is based on “best effort” and transparency of practice. Each Participant documents, for other Participants, their identity and access management practices, which they can confidently meet. Each Participant makes available to other Participants basic information about their identity management system and resource access management systems registered for use within the Canadian Access Federation. The information includes how supported identity attributes are defined and how attributes are consumed by services.

Publication

Your responses to these questions must be submitted to CANARIE to be posted on the CANARIE website. You must maintain an up-to-date Trust Assertion Document.

Canadian Access Federation – Trust Assertion Document (TAD)

1. Participant Information

1.1 Organization Name: Olds College

1.2 Information below is accurate as of this date: 04/27/2022

1.3 Contact Information

1.3.1. Please list the office, role, department, or individual who can answer questions about the Participant's identity management system or resource access management policy or practice.

Note: This information should be for a department or office rather than an individual, in order to avoid responses going unanswered if personnel changes occur.

Department (or Contact Name): [IT Department](#)

Email Address: networkteam@oldscollege.ca

Telephone: [403-507-7922](tel:403-507-7922)

1.4 Identity Management and/or Privacy Information

1.4.1. What policies govern the use of attribute information that you might release to other CAF Participants? If policies are available online, please provide the URL.

<https://www.oldscollege.ca/Assets/external/about-us/governance/policies/e-information/E02%20ITM%20Privacy%20Information%20Security%20and%20Identity%20Management.pdf>

1.4.2. Please provide your Privacy Policy URL, as well as information regarding any other policies that govern the use of attribute information that you might release to other CAF Participants.

<https://www.oldscollege.ca/Assets/external/about-us/governance/policies/general/Access%20and%20Protection%20of%20Privacy.pdf>

2. Identity Provider Information (FIM and/or eduroam)

Identity Providers must meet these two criteria for trustworthy attribute assertions:

- (1) The identity management system is accountable to the organization's executive or business management, and
- (2) The departmental processes and systems for issuing end-user credentials (e.g., user IDs/passwords, authentication tokens, etc.) have in place appropriate risk management measures (e.g. security practices, change management controls, audit trails, accountability, etc.).

2.1 Credential Practices

2.1.1. As an Identity Provider, you define who is eligible to receive an electronic identity.

What subset of persons registered in your identity management system would you identify as "Active" in identity assertions to the other Participants?

Canadian Access Federation – Trust Assertion Document (TAD)

Identities are provided to active students (as extracted from our student information system), faculty and staff (as verified by our HR dept.)
Temporary ID's are provided to external contractors based on approval from IT Department.

2.1.2. Long-lived, non-reassigned, and unique identity identifiers are critical for the safe and sustainable operation of the CAF community.

Do your identity identifiers ever get reassigned?

Yes

No

If "Yes", please include details, such as the interval between reuse.

[Click or tap here to enter text.](#)

2.1.3. "Attributes" are information elements about the identity of a person in your identity management system. This information is in the attribute assertion you might make to another Participant (Service Provider). These attribute assertions must be considered highly reliable in order for you to join CAF.

Do you consider your attribute assertions to be reliable enough to:

Control access to online information databases licensed to your organization?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Be used to purchase goods or services for your organization?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Enable access to personal information such as student record information?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

3. Service Provider Information (Federated Identity Management and/or eduroam)

Service Providers, who receive attribute assertions from another Participant, shall respect the other Participant's policies, rules, and standards regarding the protection and use of that data. Such information must be used only for the purposes for which it was provided.

Service Providers are trusted to ask for only the information necessary to make an appropriate access control decision, and to not misuse information provided to them by Identity Providers. Service Providers must describe the basis on which access to resources is managed and their practices with respect to attribute information they receive from other Participants.

Canadian Access Federation – Trust Assertion Document (TAD)

3.1 Attributes

3.1.1. What attribute information about an individual do you require? Describe each service that you offer to CAF Participants separately (one service per row).

Service Name	Is this an R&S service?	Attributes Required	Rationale	Is information shared with others?
eduroam	N/A	<p>Standard RADIUS attribute set (Appendix A of the eduroam Compliance Statement):</p> <ul style="list-style-type: none"> • timestamp of authentication requests and corresponding responses • the outer EAP identity in the authentication request (User-Name attribute) • the inner EAP identity (actual user identifier) • the MAC address of the connecting client (Calling-Station-Id attribute) • type of authentication response (i.e. Accept or Reject). 	For authentication purposes	No
Canadian Access Federation	<input type="checkbox"/>	<ul style="list-style-type: none"> • user identifier (eduPersonPrincipalName + eduPersonTargetedID) • person name (givenName + sn) • email address • affiliation (eduPersonScopedAffiliation) 	For authentication (user identifier, person name, email address) and authorization (affiliation) purposes	No

The authorization to make changes in our Active Directory is restricted to the personnel in the IT department, and therein restricted by roles. Because our AD information is based on data collected by other business units – Student Services & HR, there are also other personnel that have access to the same information. There are also similar role based restrictions.

Notes: The standard attributes for eduroam have been pre-filled to assist with completion. If you are not implementing eduroam, please delete this row.

Additionally, an example of a [Research & Scholarship \(R&S\) Entity Category](#) FIM service and its associated attributes has been included. Please delete this example and enter your own data, as applicable. Add additional rows to the table, as required.

Canadian Access Federation – Trust Assertion Document (TAD)

3.2 Technical Controls

Technical controls are a basis for controlling access to and usage of sensitive data and are expected to be applied across all services. If there are exceptions for a particular service(s), please describe these exceptions.

- 3.2.1. Describe the human and technical controls in place for access to and use of attributes considered personally identifiable information.

The authorization to make changes in our Active Directory is restricted to the personnel in the IT department, and therein restricted by roles. Because our AD information is based on data collected by other business units – Student Services & HR, there are also other personnel that have access to the same information. There are also similar role-based restrictions.

- 3.2.2. Describe the human and technical controls that are in place for the management of super-user and other privileged accounts that may have the authority to grant access to personally identifiable information.

This type of authorization is limited to very select few individuals within the IT department. This access list is frequently reviewed.

- 3.2.3. If personally identifiable information is compromised, what actions do you take to notify potentially affected individuals?

Follow Olds College and FOIP policies. E.g. take the compromised service off-line and contact the Olds College FOIP officer who along with Executive advise on the best course of action. Depending on the scope/size of the breach, the Office of the Privacy Commissioner of Alberta may be involved.

3.3 Other Considerations

- 3.3.1. Are there any other considerations or information that you wish to make known to other CAF Participants with whom you may interoperate?

no
