

## **Canadian Access Federation: Trust Assertion Document (TAD) for Participating Organizations**

---

### **Purpose**

Identity attributes are characteristics of an identity -- such as a name, department, location, login ID, employee number, e-mail address, etc.

A fundamental requirement of Participants in the Canadian Access Federation (CAF) is that by their authority they send accurate identity attributes to other Participants to allow access to resources, and that Participants receiving an attribute assertion protect it and respect privacy constraints placed on it by the asserting Participant.

To accomplish this practice, CANARIE requires Participants to make available to all other Participants answers to the questions in this document.

### **Canadian Access Federation Requirement**

The CAF community of trust is based on “best effort” and transparency of practice. Each Participant documents, for other Participants, their identity and access management practices, which they can confidently meet. Each Participant makes available to other Participants basic information about their identity management system and resource access management systems registered for use within the Canadian Access Federation. The information includes how supported identity attributes are defined and how attributes are consumed by services.

### **Publication**

Your responses to these questions must be submitted to CANARIE to be posted on the CANARIE website. You must maintain an up-to-date Trust Assertion Document.

# Canadian Access Federation – Trust Assertion Document (TAD)

---

## 1. Participant Information

**1.1 Organization Name:** ORION

**1.2 Information below is accurate as of this date:** 01/29/2026

### 1.3 Contact Information

1.3.1. Please list the office, role, department, or individual who can answer questions about the Participant's identity management system or resource access management policy or practice.

**Note:** This information should be for a department or office rather than an individual, in order to avoid responses going unanswered if personnel changes occur.

Department (or Contact Name): ORION IT Support

Email Address: it@orion.on.ca

Telephone: 416-507-9860

### 1.4 Identity Management and/or Privacy Information

1.4.1. What policies govern the use of attribute information that you might release to other CAF Participants? If policies are available online, please provide the URL.

**Our privacy statement is available at <https://orion.on.ca/privacy-statement/>**

1.4.2. Please provide your Privacy Policy URL, as well as information regarding any other policies that govern the use of attribute information that you might release to other CAF Participants.

**<https://orion.on.ca/privacy-statement/>**

## 2. Identity Provider Information (FIM and/or eduroam)

Identity Providers must meet these two criteria for trustworthy attribute assertions:

- (1) The identity management system is accountable to the organization's executive or business management, and
- (2) The departmental processes and systems for issuing end-user credentials (e.g., user IDs/passwords, authentication tokens, etc.) have in place appropriate risk management measures (e.g. security practices, change management controls, audit trails, accountability, etc.).

### 2.1 Credential Practices

2.1.1. As an Identity Provider, you define who is eligible to receive an electronic identity.

What subset of persons registered in your identity management system would you identify as "Active" in identity assertions to the other Participants?

ORION does not currently provide identity assertions to other Participants (e.g. SAML), but if it does in future we do not distinguish between different types of persons registered in the system.

# Canadian Access Federation – Trust Assertion Document (TAD)

All persons in the system are legitimately allowed to use ORINO services and would be identified to CAF as “Active” Participants.

- 2.1.2. Long-lived, non-reassigned, and unique identity identifiers are critical for the safe and sustainable operation of the CAF community.

Do your identity identifiers ever get reassigned?

☐ Yes

☒ No

If “Yes”, please include details, such as the interval between reuse.

- 2.1.3. "Attributes" are information elements about the identity of a person in your identity management system. This information is in the attribute assertion you might make to another Participant (Service Provider). These attribute assertions must be considered highly reliable in order for you to join CAF.

Do you consider your attribute assertions to be reliable enough to:

Control access to online information databases licensed to your organization?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Be used to purchase goods or services for your organization?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Enable access to personal information such as student record information?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

## 3. Service Provider Information (Federated Identity Management and/or eduroam)

Service Providers, who receive attribute assertions from another Participant, shall respect the other Participant's policies, rules, and standards regarding the protection and use of that data. Such information must be used only for the purposes for which it was provided.

Service Providers are trusted to ask for only the information necessary to make an appropriate access control decision, and to not misuse information provided to them by Identity Providers. Service Providers must describe the basis on which access to resources is managed and their practices with respect to attribute information they receive from other Participants.

### 3.1 Attributes

- 3.1.1. What attribute information about an individual do you require? Describe each service that you offer to CAF Participants separately (one service per row).

## Canadian Access Federation – Trust Assertion Document (TAD)

Service Name	Is this an R&S service?	Attributes Required	Rationale	Is information shared with others?
{FIM Service 1}	<input type="checkbox"/>			

**Not applicable as ORION does not offer FIM services at this time.**

**Notes:** The standard attributes for eduroam have been pre-filled to assist with completion. If you are not implementing eduroam, please delete this row.

Additionally, an example of a [Research & Scholarship \(R&S\) Entity Category](#) FIM service and its associated attributes has been included. Please delete this example and enter your own data, as applicable. Add additional rows to the table, as required.

### 3.2 Technical Controls

Technical controls are a basis for controlling access to and usage of sensitive data and are expected to be applied across all services. If there are exceptions for a particular service(s), please describe these exceptions.

- 3.2.1. Describe the human and technical controls in place for access to and use of attributes considered personally identifiable information.

**The user ID is stored with the domain controller in Active Directory. The data within the DC is encrypted and is accessible only by ORION's IT Administrator. There is no PII stored on the domain controller.**

- 3.2.2. Describe the human and technical controls that are in place for the management of super-user and other privileged accounts that may have the authority to grant access to personally identifiable information.

**The management of privileged accounts and the authority to grant access to PII is a centralized function managed by ORION's IT Administrator upon the approval of the Chief Technology Officer.**

- 3.2.3. If personally identifiable information is compromised, what actions do you take to notify potentially affected individuals?

ORION notification process aligns with the PIPEDA (Personal Information and Electronic Documents Act)

### **3.3 Other Considerations**

3.3.1. Are there any other considerations or information that you wish to make known to other CAF Participants with whom you may interoperate?

None, N/A
